The railway company has been advertising for several days for men. The strikers have not been able to find where the men responding to these advertisements are gathered. ## **GOLFERS WANT CHANGE** IN ELECTION METHODS OF NATIONAL BODY

Effort Will Be Made at Coming Meeting to Secure Direct Nominations.

United States Golf Association next Saturday night in this city. Action will be proposed that hereafter the dele-gates at the annual gathering elect the nominating committee each year. A scheme has somehow always prevailed by which the nominating committee, beside naming the candidates for office, selects its successors by appointing the nominating board for the ensuing year. The result has been to make the committee a self-perpetuating body, or so near it that certain persons have been able to build up a machine that would do credit to Tammany Hall politicians in the old days.

A few years ago when a split

in the national ranks provision was made for independent nominations clubs. The "ailled" clubs, however or five to one, can secure no redress. Even the loophole of relief supposed to be afforded by the independent slate amounts to little because so much red tape is it.volved. One of the best known metropolitan golfers in com-menting on the situation says:

'Insiders realize that certain influences have been secretly at work ever since the United States Golf Association was formed, and have been powerful enough all along to maintain a system which, with shight interruptions, has enabled them to dominate the national policy. One of those interruptions was the triumph, two years ago, of the sup-porters of the Schenectady putter. They might not have prevailed, however, had not the national officials at the time been unusually broad-minded and regarded the situation from an American viewpoint, rather than that of St. An-

drews.

"Practically the last of that board are soon to go out of office, amid general regret, for, under the leadership of President Strawn of Chicago, constructive, tendencies have been advanced, sections harmonized and views broadened.
